

Daniel Nima MEng Technical Assistant

Daniel graduated from the University of Exeter in 2015 with a Masters (Hons) in Mechanical Engineering. During his course he specialised in Computational Fluid Dynamics (CFD) in relation to automotive prototyping, new developments in materials engineering and also anaerobic digestion.

Dan completed an internship in Goa, India during his third year of study where he helped design and implement a relatively large digestion plant that processed the organic waste from the municipal market adjacent to it. He also experienced the troubles a monsoon season can wreak.

Dan joined Sanderson & Co. in 2015 where he is currently studying to become a Chartered Patent Attorney and European Patent Attorney. He also hopes to complete the notorious exams without a hitch!

In his spare time he regularly participates in powerlifting, enjoys language learning and travelling to obscure countries.

Qualifications

MEng - Mechanical Engineer, University of Exeter - 2015
